

Assembly- and Installation – Instruction for the

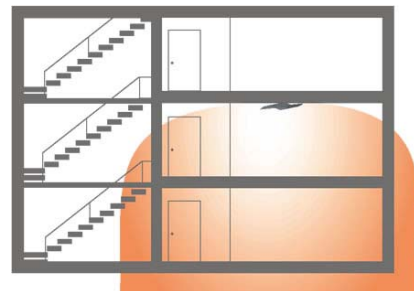

CA geowave®-Wave

1. The use and the assembling of the geowave®-wave is conceivable easy. Before the wave gets installed you merely have to find out the right place as the geowave®-wave has to be assembled on an undisturbed place. The optimal place can be found out through a dowser or you assemble it on a place where you already feel very well.
2. The „wave“ should be assembled centrally because so the sphere can be used perfectly! In an apartment with just one floor you have to assemble the “wave” on the ceiling. In multi-level apartments or houses, you assemble it on the ceiling of the top-floor or at the attic. The harmonising effect of the „wave“ spreads out circularly on the side and downwards.

3. If you have found your personal right position, just install the attached hook.

4. Unwrap the „wave“ and please check its completeness.
Beware: The edges of the “wave” can be sharp-edged.

a. mechanism for hanging up

5. Turn the mechanism for hanging up.

6. On the backside of the „wave“ you can find a holder, in which you can put a small flask with homoeopathic essences for example.

7. Now you only have to hang up the „wave“ on the attached hook and arrange it horizontally.

8. Pay attention that the „wave“ is fixed and assembled that nobody is at risk.

We wish you a lot of joy and energy with the **geowave®**-wave!

Should you have any further questions about the assembly and the effect of the **geowave®**-wave, please do not hesitate to contact us!
